Topic: LC 2

I admittedly oppose the increase in new taxes and vehicles fees in any manner. As a retired constituent and resident of Oregon this idea of placing additional fiscal burdens on the people here is the wrong thing to do. A large portion of the working class people are struggling with finances already. The state government needs to step back and make adjustments to the current budget and fund the necessary line items and cut the fraud ,waste and unnecessary items in the current budget. This can be done and must be done without causing undue hardship on us, the great people of Oregon .
