As a pioneer Oregon resident, I have watched the state budget increase for many years. This is no such a burden that living here almost seems like a detriment. Businesses are leaving the State to find literally greener pastures elsewhere. And now we have the latest barrage of new burdens on the tax payer with most likely nothing more to show for than in the past. Many Oregonians like myself are on a very limited income, yet it's never enough as government continues to grow at an alarming rate. I'm writing this to show my opposition to any new taxes.
