RE:2025-2026 INTERIM

I respectfully submit my opinion on this issue. The regular legislative session profoundly told the body NO on this outrageous tax increase.

It would appear the adults have left the building, but the children throwing temper tantrums because they did not get their way remain.

Of greater concern, which should be to everyone, is how the tax/fees are actually being used. We the people, you know, the ones PAYING said dollars, have lost complete confidence in the competence in this area. Not to mention the same payers views are obviously being ignored. TRUST is shot and the current Governor's campaign message was transparency. I haven't seen any of that thus far.

Time to stop spending, make some cuts and do the job you said you could do. OR was that all LIES?

I say Absolutely "NO" on this extreme Taxation.

Sincerely submitted,
