Governor of Oregon. Oregon residence have been taxed to the point that it's almost impossible to live people on Social Security like myself don't get any more money and things keep going up up up. Gas is four dollars a gallon in Eugene and I have to pay more gas tax is not .acceptable. And then for you to want to raise the registration for cars it's just more than we can handle. If you took the money that you were giving to the illegals, then there would be money for the transportation. You just don't have your priorities straight and we need better leadership in Oregon
