Measure, Appointment or Topic:	LC 2

Oregon taxes have done nothing but consistently increase. It has made it impossible for families to live and thrive in our once beautiful state. Every change that has been made "for the better" has only made it more difficult for everyday people that have to deal with the mess this state has become. People are leaving in record numbers to flee the mess this has all become. Kotex, you're already hated enough- don't make it worse by increasing taxes across the board. If you do then Oregon will not only be known for tent cities but we will become a tent state.
