Topic: LC 2

No new taxes! Oregon has mismanaged the past and current budgets at the taxpayers expense.

The transportation budget is over inflated with mass improper spending. Too many wasteful projects that take way too long to complete. By the time projects are completed they are out of date. Planning for the next couple of years is wasteful spending and poor planning. Reduce ODOT Executive level employees. Take the \$30 million from the social equity budget line and terminate the DEI departments. You'll find millions of available funds.

There is no more taxpayer money!
