Funding

Measure, Appointment or LC 2
Topic:

So again, just another way to put more burden on business, middle and the lower class. Who do you think will be most affected by raising taxes and registration fees. Why can't the governor and the legislature just spend what they bring in. Why can't you just do like every household and live within your means. There is a reason why businesses aren't coming here and why more people rely on the government to get by. You are killing the dream of many Oregonians and with this rise in costs many will be leaving. Don't go forward with this and start thinking of your constituents and quit being wasteful. If you want to be like California then move there and let us be.
