

Submitter:	Marvin Parker
On Behalf Of:	self
Committee:	Joint Interim Committee On Transportation Funding
Measure, Appointment or Topic:	LC 2

The actions of the Governor to raise the taxes of the Citizens of Oregon are unnecessary and harmful to the millions of hard-working citizens who are struggling under the boot of this Marxist government. Raising taxes and fees to continue to support a bloated and incompetent workforce at the expense of an impoverished populus is unconscionable. Millions of our taxpayer dollars are being spent on services for illegal aliens, abortions and transgender treatments and surgeries, that money could be better spent on transportation. Millions of taxpayer dollars are being wasted on trains that are not ridden, bridges that will not be approved by the Coast Guard, and outrageous salaries and benefits for transportation workers that are well beyond private sector norms. Your protectionist policies and your unnecessary war on fossil fuels have led to the creation of a recall petition against the Governor. If these taxes and fees are enacted into law the voice of the people will not be silenced and that voice will be heard in the midterm elections and the next general election. The tax and spend Marxist Democrats will hear from the people loud and clear. We are sick and tired of your theft of our money and the abuse of our future generations.
