Measure, Appointment or Topic:	LC 2

Does another few billion move the needle in terms of fixing anything or is this just more robbery of the tax payers? Will Tina come back next year with hat in hand to pull the same ruse? Why is the State hiring DEI roles (Inclusive Transformation Analyst)? Why are some streets getting slated for projects where the lanes are being removed? Who is coming up with all the wasteful projects to pad their resumes? Tina needs to work with what she's got instead of constantly coming up with new revenue pet projects. Anyone else who supports this tax increase obviously has their hat in hand looking for some funding. Why should the entire state support your pet projects?
