I am writing in opposition to the new proposed transportation bill that has been presented. Oregonians are already taxed to death and adding additional taxes that would raise gas tax, registration fees, etc is the very tipping point that would absolutely harm Oregonian's adding these additional costs. Oregon has kicked the van down the road for numerous years and putting the burden on oregon families due to lack of practical management and budgetary responsibility is a pure reflection of poor government! Quit taxing your citizens and learn to budget better!!!
