Committee: Joint Interim Committee On Transportation  
Funding

Measure, Appointment or  
Topic: LC 2

As a resident of Oregon for the last 13 years, I strongly OPPOSE this transportation funding proposal. The mismanagement of the ODOT budget needs to be addressed using the money and resources already available, not by taking more and more from taxpayers while continuing to fail at providing said tax payers with what we have been promised (road maintenance, appropriate planning, etc.) Oregon has become a state that is almost unlivable due to high cost of living. Adding even more of a burden on tax payers at the fuel pump, with registrations, with payroll taxes, and Road Usage Charges, is not the way to go. Your job as our Legislature is to listen to your constituents and make the best decision for US based on what we want and need. Vote against this funding proposal.
