Committee: Joint Interim Committee On Transportation
Funding

Measure, Appointment or
Topic: LC 2

The state of Oregon's government seems to have lost track of its purpose and has grossly abused its power by ignoring the will of the people for well over a decade now. It's time to hold all government agencies accountable. A full and complete audit should be made and released to the public before any more funds are allocated to ODOT or any other agency for that matter. It appears that we have such deep seated corruption within the government that the governor and the legislature feels empowered to keep stealing more and more money from the tax payers, but I can assure you there is a breaking point and we are at that point. I would urge this committee to think long and hard about proposing or passing any additional tax measures on the public right now. It's time to take some fiscal responsibility and do the hard work of stopping the wasteful spending.

Thank You for your time,

Dean Blades
