I must say that I am very disappointed in our Governor and legislature. It seems that the answer is too continue to through money at a failed inefficient corrupt system.

The people of Oregon need our tax dollars used first for the purpose the funds were collected for and second in reference to ODOT and Oregon's road system need to be repaired and maintained correctly using quality materials and demand quality work. All work must be reviewed, inspected, inspected and if not to standards forfeit any payment.

Governor Kotex isn't the answer, she already had her Crack governing Oregon. The "SKI IS FALLING" is your answer to raise taxes instead of truly managing a crisis with leadership and do what's truly the best path!!!
