Topic: LC 2

ODOT does not need more money, it needs a reorganization, and changes in law and policies, all which Governor kotek already has the ability to do.

No new taxes or fees, no increased taxes or fees. Oregonians are already strained to the breaking point. Oregon has become unfriendly to business due to its tax and policy structure.

Legislative decisions have consequences, elections will correct those who don't represent oregonians, but submit to the strong arming and bullying of their peers and governor.
