It is unconscionable that our elected officials are considering raising new taxes. Oregon is already one of the highest tax states in the country. You will again chase away more high income earners and companies and continue the doom loop here in Oregon. If the legislature sat down and looked at ODOT's costs and expenses and got rid of the waste, I'm certain that tax payers would be open to limited tax increases to close some gaps. However there has been no serious attempt to cut costs and therefor there should be no new taxes. Thank you for listening.
