Topic: LC 2

As a 68 year Oregon resident, and a farmer for 50 years, we are just maxed out of Government Taxes, fees and over reach. We are not getting anymore for our commodities then we did years ago and yet, we are always the pocketbook for more money. It is a gamble being a farmer with crop pricing, weather, fuel costs, DMV costs, forms, forms, forms-but we do it because we enjoy farming and we want to be in goods production and not just in service economy. That is not sustainable. Oregon needs to start reducing government and start appreciating businesses that are actually bringing in money and not spending it. We work hard, pay a lot of taxes and we feel like it is not appreciated. Please vote NO on the Transportation bill proposal. We can not afford it!
