Although I understand taxes are a way of life and needed for infrastructure of our great state. I think along with the increase there needs to be changes within ODOT so they don't come again in a few years again. It doesn't make sense that once the original bill failed, they threatened with layoffs that would cripple our way of life. it worked last year without these extra funds, now we are threatened. Someone needs to oversee ODOTs money trail to insure there's no fraud or corruption. we all have to tighten our belts and review our spending to eliminate waste. Why can't ODOT???
