Committee:	Joint Interim Committee On Transportation Funding
Measure, Appointment or Topic:	LC 2

It is a travesty when one party seems to think they can treat businesses and the people who reside in this state like they are nothing more than a wallet to extend their agenda without even looking at what the other party is proposing. The people of this state have sent the message several times now--"NO MORE TAXES". Why you can't hear this very loud cry is beyond the understanding capabilities of most of the tax paying population of our great state. Instead of just looking to run as many people and businesses out of this state as you possibly can, why don't you look for ways to make thing run better, without the monies already allocated disappearing into who knows where. Governor Kotek, you got elected on a platform of transparency, so provide us with that. Tell us why, (instead of just telling us) and back it up with statistics and documentation. There are more people in this state than just those who live in the areas you like!
