As a low income family here in Oregon, we can't afford these rate hikes. While I see other states lowering their costs, even eliminating some taxes, the legislation, which I did not vote for, here in Oregon is again trying to raise ours. Gas prices are too high, the cage free eggs you decided we needed without my vote, are too high. Why are you continually undermining our rights as citizens? No wonder so many of my friends are moving out of state. This state needs an audit of its spending. I say a big fat NO to your special session vote!
