State of Oregon,

I do not support any more taxes and especially in this situation. We are already taxed some of the highest in the Nation. The government and ODOT need to be more efficient and figure out how to better use their money for tasks that are needed and not BS processes. Oregon government needs to learn how to budget like the rest of must do, so suck it up and learn to live within the means of funds that you have. Time are tight and all the more tighter with how we are already being taxed. Stop wasteful spending and live within your current budgets that are also some of the highest in the Nation due to all the taxes we already have. We have some of the highest taxes and worst roads, and worst rating as a State thanks to bad leadership that is only trying to push political agendas and not listen to or benefit its people.

NO on more taxes!!
