Topic:

No taxation without representation!

The state has already over collected so many taxes, there is a large kicker refund coming up for 2025.

People on a fixed income cannot afford MORE taxes. So many places for sale as residents try to leave the state due to taxation and regulation. Industries have been destroyed and many are leaving the state to escape the same.

When is State government going to wake up to the financial suicide you are setting all of us up for?

Please do NOT pass this effort to force the state to self destruct along with the ruined populace.
