As a concerned citizen of Oregon, I strongly feel we DO NOT need more taxation in Oregon!!

We are one of the highest taxed states in the country! My property taxes continue to increase each year, but the quality of our return on our investment continues to decline!

The public schools are another good example of careless budgeting and spending! We spend more per student yet rank very low in the quality of education for our children!

Please carefully review the current budget amount and find ways to increase efficiency to do more with what you already have!!

Thank you!
