Taxes should be raised without voter approval under any circumstances. By the people, for the people. It's time the people have the voice. Elected officials do not know more than the general public and need to learn to live within their means just as we the people do. No government official or private group should be making these kind of decisions. Taxing people out of jobs, homes and foods is ridiculous. Every time you create a new division, new subdivision or what have costs more and more to jpaychecks, pensions and oversight people making large sums of money. I worked in government for 27 years and my husband worked for the public schools for a bit. There is a TON of waste that needs to be curbed. No tax raises or fees without putting it to the vote of the people. No legislative tax or fees without putting increases. You don't truly represent the people. We all know it. Governor Kotek you don't know how the average person has to live. You are clueless. It's time for the people to take this state back. NO new taxes, NO tax increases and NO fee increases. Cut the waste and figure it out either way what you have! Oh, and stop fighting the federal government. You are wasting time and money by not complying!
