As a tax paying citizen I am frustrated by the politicians in power trying to solve Oregon problems by further lowering overtaxing citizens who actually work for a living by robbing us and throwing dime after dollar of tax payer money down a bottomless pit to address our state issues. Fiscal responsibility is something every working adult must master. Why not ask the same of our politicians. Many of us work with ODOT for example and have watched the boondoggle of project after project going over budget and no oversight or consequences for it. I am against watching this government drive us off a cliff over and over then asking the hard working folks to pay for another free ride. In this downward economy squeezing us will be remembered on Election Day. You want to punish us for driving hybrid vehicles? We need a fresh approach and new ideas something which is lacking. I say no to all these new tax increases.
