I am deeply disturbed about a transportation bill that will make Oregon an even more expensive place to reside!

The State of Oregon must be more creative in its approach towards making ODOT run much more efficiently other than jacking up the price of living and working in this state for families, seniors, like myself and my wife, and young people trying to get ahead who are so discouraged they can't fathom the idea of ever owning a home or advancing in life. This is absurd and ridiculous! The cost of living in this state is already nearly prohibitive, With cost of groceries, fuel, and essentials on the rise since Covid, struggling business owners such as a local favorite restaurant in my town have been steadily raising prices and this will only force them to charge more or put them totally out of business as people leave this state where there is clearly zero adults in charge. Those with power are corrupt and need to be recalls or voted out. This transportation bill is insanity. Thankfully we have some legislators left in our system who have the horse sense to help put a stop to this insanity.

Sincerely

Timothy Rawlins
