I wish to be anonymous if possible

I can not take on more expenses. The cost of energy, water and food is making life difficult. To add more taxes on an over taxed population is not in the best interest of Oregon citizens or its future. I would like to see an audit of the State expenses so you can fix the spending problem in our state. Raising taxes will not solve the spending problem. I retire within 10 years and I'm already looking out of state because it will be impossible to live comfortably in Oregon at the rate we are going. If I move the kids and wife (4 tax paying citizens) will leave too. You have time to change my mind with action. Please fix the state spending problem and don't raise taxes.
