Committee: Joint Interim Committee On Transportation
Funding

Measure, Appointment or
Topic: LC 2

Oregon tax payers have reached the limit. No new taxes. Reallocate funds to reflect how our state demographic has changed. Look at public transportation ridership- it's changed, so change the funding. We need real solutions to problems like drug abuse and homelessness. Who is in charge of all the NGO's who work against each other, instead of coordinating efforts to make a real difference.? We need more funds going to citizens infrastructure and less to the illegals legal fund. Take care of those who pay the bills not the folks who drain our resources dry. Don't fire 500 folks who keep our roads safe- fire the top heavy bureaucrats who create more highly compensated positions for their cronies. Remove all DEI program managers. Save our state by keeping businesses here and not forcing the relocation of companies who provide good paying jobs like Intel. Please listen, find a way to perform your job properly, not threaten bad service unless tax revenue is raised. It's always a last minute crisis and it's BS. The money is already there, allocate it correctly and save our state economy.
