We simply cannot afford any more taxes. Affordability in Oregon is horrible. Employers are cutting salaries for certain sectors. I urge you to stop increasing taxes and look at where you are overspending. I'm a 1099 with a large insurance company and they changed our contract and my income is half of what it used to be. People think insurance playmaker a fortune, how about \$48k untaxed! Used to be a fair wage, not any longer. I've heard other occupations are doing the same thing. Please be accountable with the money we give you.
