Topic: LC 2

I strongly opposed this bill. Oregonians cannot afford the extra fees that this bill would place on our gasoline and automobile registration. The cost of living is already too high. By raising prices on fuel, food, transportation and every other basic need will go up in price and this will be a major detriment to our economy and the people of this state. Please consider managing the funds from the taxes and fees that we already pay efficiently and direct them toward helping our state and LEGAL residents. Thank you.
