

To Whom it may concern:

The State of Oregon is out of control with its taxes already.

If the State was run more like a business, we would not be in the place we are today.

No new taxes! By adding more burden on your residents, you are making it harder for us to survive. We work hard for our money and just to see it blown away with waste and no accountability. The State expects us to pay our taxes or there are consequences. Why can't there be consequences for not being able to justify where the money has gone. You would expect that from a business that you're taxing.

Why not start doing an audit of the ODOT and other agencies. Why can't they be held accountable for how they are spending our money. It isn't Oregon's money it is money the people of Oregon have trusted you with to do the right thing. If we keep it up, we will be more like California and Washington. Let's Make Oregon Great Again! Not making it worse than it already is. Take some pride in our state and show its people you can be responsible.

So, I hear there is a shortfall that ODOT needs to cover, pull that money from the rainy-day fund, that is what it is there for. Now its time to start doing Audits, and if books are not aligned with what it is supposed to be, it is time to bring accountability.

We are tired of being taxed to excess, Please STOP!

Mr. Johnnie Taylor

Klamath Falls Oregon, 97603
