I am a single mother with a part time job of only 20 hrs MAX. I have tried for years to get jobs after my position at our local hospital CMH was eliminated during covid times. I live off of SNAP and Medicaid and can barely afford to live. Why are you trying to hurt the people barely getting by?? The cost of gas alone keeps me isolated because I have to have it to get to work and only fill up when I get paid once a mth from the college. Please stop!!!!
