Committee:	Joint Interim Committee On Transportation Funding
Measure, Appointment or Topic:	LC 2

I have lived in Portland city limits for 48 yrs. In all this time our governing powers have never learned how to live on a budget. I have to live on one, so I expect them too. I have received information from Christine Drazan that there is money and arrangements being made that we go have the money to do this if this outrageous bill doesn't go through. After watching all the news about money short falls and news breaks on money that is spent on Kotex's girlfriend spending taxpayer dollars, plus all the other whistle blower information, I am just sick and tired of the money wasted on selfish frivol ice trips, theft and shady deals to make themselves look good. Those of us watching are living with a broken system that allows all the nonsense while we are all living with potholes you can stock with fish, properties not cared for and a homeless population that we are enabling. This whole process is broken, and I am ashamed of Portland. As child I knew Mark Hatfield, he had a handle on the problems here, since then it's all gone down the tubes. The money is there now to fix, it's the knot heads that are misdirecting funds. I do NOT support the highway funding.
