Measure, Appointment or
Topic: LC 2

Please stop this attempt to add more taxes and fees to Oregon citizens. The financial impact on the average taxpayer is too great. People need relief, not crippling taxes and fees.

ODOT is inefficient and no longer effective, they need an in-depth audit of spending and productivity before any more money is wasted. Get rid of the union like contracts for state highway contractors, stop the DEI funding (we have laws preventing discrimination), and cut out unfilled positions in the department.

Stop punishing families, retirees and low-income citizens for mismanagement of government budgets.
