Regarding the Special Transportation Framework bill LC-02

This is just another tax and spend plan with an even bigger problem. It will allow the ODOT bureaucrats to raise taxes with no vote of the legislature or the people of Oregon. .Combine this with the other proposed taxes and the fact that that Oregon is already ranked as 49th in corporate business and 40th in individual income tax. Is there any end to this nonsense. We desperately need a DOGE style clean out of bureaucrats. You would be amazed at how much money you would find. Start with whoever is in charge of Oregons computer systems. One huge multimillion dollar failure after another. Start cutting costs instead of constantly coming back to the tax payers for more money.

Sincerely,
Richard Todnem
