

To the Joint Interim Committee On Transportation Funding:

I am a widow at 70 still having to work just to make ends meet. I cannot afford any new taxes especially. For transportation ODOT matters. I feel that it is irresponsible to impose more taxes and we are not being represented or listened to. The fact that the first bill failed should be a big red flag.

Our roads are in terrible shape with potholes and torn away asphalt, road construction seems to be taking a lot more time than we believe it should. Used to be called "milking it" in my day.

Registration and tabs are already so high that even every other year is too much.

This is a big heck no on ANY taxes until it can be justified and accountable with what we have already paid!!!

Thank you, A very concerned citizen.
