Topic: LC 2

I am submitting this in absolute opposition as I had previously. This package does nothing to fix our broken system but puts even more weight on the shoulders of Oregonians. Our voice said no before and is saying no again. WE DO NOT WANT TO BE TAXED MORE! We want the broken system repaired and our tax dollars spent where and how they are supposed to be spent. We also want the work previously assigned completed before any more money is spent on further back logging due to irresponsible decision making. We also want auditing completed with public transparency. Hear myself and the majority, both Republican and Democrats. NO!!!!!!
