Measure, Appointment or LC 2  
Topic:

Dear Committee Members,

I live in Salem, and I would like to express my alarm over the transportation bill. Please consider that I am already taxed heavily and many people I know are financially spread thin. At the school where I volunteer, many families as well as some staff need assistance just to make ends meet. Adding a new wave of taxes on gas, car registration, EV charges, and payroll will actually push all of us further into financial peril and worry.

We already pay taxes that supply the budgets to our state dept. of transportation. Right now, it needs to be enough! I expect that you will spend only what you have received and that you prioritize the money for safety on our roads. I request that you make the budget work without adding new taxation, just like I do in my life. You adding these taxes on people living and working right now is just wrong!

Respectfully,

Lonna Bauer
