I am writing in opposition to these new taxes. As stated by Representative Drazen ODOT needs to clean its books and figure out how to stay within budgets for projects before asking for more money out of our pockets. These new taxes are already going to harm more of the lower income and middle class than is already being done by the states outrageous nickel and dime schemes to tax money that has already been taxed 4 or 5 times already.

This garbage was voted down during the regular session why should Kotek be able abuse her power to call in a second run to this just because she did not like the outcome. If it was a doable system, I am sure the Democratic Majority would have ignored the other side of the aisle and voted this on through. The fact that they did not tells us that this is a very very bad change.
