Measure, Appointment or Topic:	LC 2

I live from paycheck to paycheck. I don't have allot of money to play with. At the current price of gas and registration fees it's almost impossible for me to get by. I feel like I'm getting taxed out of living in my home state. I believe our governor is out of touch with the middle and lower class people. Our struggle just to make money to pay our rent and keep our vehicles running so we can get too work. If the governor would try living on our wages she might understand.
