Measure, Appointment or
Topic: LC 2

Please do not increase taxes for families. People are just making ends meet. By increasing taxes for Oregonians and taking away money for food, bills and basic needs. It is becoming harder to live and people are working two jobs and overtime just to get by. The organ department of transportation needs to be audited on the way they spend money and they should be only using money for core projects, not frivolous fancy projects that only Portland resident will get to use. our family is struggling like everyone else and you are hurting Oregonians.
