it's about time that we start dismantling the Oregon government to save money, not trying to find ways for taxpayers to pay more money to support a bloated government that is wasteful and has a retirement system that needs to be overhauled.

The idea that we need to pay more while none of the government employees cut back where the systems are cut back is ludicrous. We're in a position right now that if we continue to fund and overtax our constituents, we will totally bankrupt everybody in the state, all of us are making less few people or making more everything's gotten more expensive and now you wanna text us more to make the Oregon government more prosperous, and continue to fund PERs.

find ways to cut government spending programs and privatized more operations so we don't have to have big government. You can't continue to bankrupt the people of the state just to support what you think the state needs.
