Funding
Measure, Appointment or
Topic: LC 2

Dear Honorable Members of the Joint Interim Committee on Transportation Funding:
This is not the time to be taxing already over-loaded families with more taxes. Groceries have increased, the cost of gas is ridiculous, daily necessities (water, sewer, electricity, etc.), all have put a burden on families of this state. Medical, Care-giving, insurance, car purchases, household repairs, the cost of everything is going up daily. It is unreasonable to put the weight of mismanaged department funds on the shoulders of the people of Oregon.

Department of Transportation has put "Crosswalk Closed" barriers where there were no crosswalks, drawn bicycle lanes where there are few (if any) bicyclists, and installed ADA compliant sidewalk ramps over the tops of areas where those ramps were already in place, etc. Please, do the people of Oregon right with your No vote on this terrible transportation bill proposed by Governor Kotek. The people of Oregon deserve better representation and you are the ones who are charged with doing what's right for the people of Oregon.

Thank you for your consideration.

Regards,
Dana Baugher
