Dear Sirs and Madame, Please give this tax on gas careful consideration before voting yes. The working people of Oregon are suffering already, most need gas to get to work, gas is required to deliver merchandise, when gas goes up so does the prices of merchandise. A better idea is to cut and better prioritize spending. Cut high end spending. Cut unnecessary departments such as DEI. Get the workers back to work on Oregon roads, highways all the things we pay our taxes for. Could you please consider cutting the gas tax to make it affordable for workers to go to work? I have faith in our law makers, you can do it! Cut spending in the state and ODOT, prioritize spending on things taxes should be spent on. I have faith, you can do it! Thank you, Ginny Stegemiller
