I can not afford more taxes. My adult children can not support their families working 50 hours a week. You are forcing people born and raised in this state to have to look at relocating to a different state. You have pushed out business one after another due to your mismanagement and corporate tax. Do not put more weight on working families. We can not take anymore taxes.

Our school bus shortage will continue. If you are forcing more people that want to work in their community, the cost to them with added DMV fees and shortage of CDL testers the shortage will continue. This puts more pressure on school districts to get kids to school with less buses, more cost in fuel, straining the people of this state
