I am very much against raising taxes because ODOT didn't plan well. I'm supporting a family of 6 and due to 2022+ inflation, I've had to trim my budget to the bare bones just to break even. Why can't ODOT do the same? There are way too many administration costs and why are e-vehicles getting off "scot-free" on no gas tax, gov rebates, etc.?

Thanks for listening, Ben
