I oppose this tax hike. It is government over reach and it must stop. Oregonians are burdened to the brink of collapse by high taxes, cost of living, housing, etc. I lost my job at Nike after 23 years due to a workforce reduction. Me and hundreds of my colleagues are now scrambling to find like kind employment in the technology field and it doesn't exist here. Intel employees have joined us in the job hunt making it next to impossible to get an interview because when the one unicorn job does get posted, there are over 100 applicants. The last thing Oregonians need is higher prices on the basic living expenses. Manage the money you've got and stop relying on our hard earned money to fund your failure!
