The people of Oregon have had enough!We keep getting more and more taxes but less in return.The whole state needs an independent audit so we know how our money is spent.Fighting the federal government and funding pet projects is not what we the people want .If this continues there is going to be a huge red wave engulfing this state.People want their state back and to have a say in how it is being ran,stop this now!Our governor has her own agenda and is not representing the citizens
