Measure, Appointment or  
Topic: LC 2

I'm a senior citizen (71 years old) who is still working to make ends meet. In the last 4 years with Biden we have seen massive inflation, stagnant wages and a flood of illegal immigrants. We seniors struggle everyday, just like the younger citizens with living paycheck to pay check or social security check to social security check. We are still need to drive, so an increase in gas, registration fees and title fees, along with every other tax this legislature has in its sights are unrealistic. For once we need you politicians to look where all the past money has gone. A major audit and transparency to the citizens of the finding should be mandatory. I know many of the departments pad their yearly budgets, infact my husband worked for a company who did vehicle repairs for the city , county and state and every year the customer would say they had to use the money in the budget so they could request more the following year, even though many of the services they requested were unnecessary, they just needed to "spend" the money. So I want to know where all the tax dollars for roads has gone before you even think of raising our taxes. Prove that you need the money, show us line by line where you have spent our hard earned dollars.
