Topic: LC 2

Oregon's wasteful spending and defiance of federal laws and regulations by the governor is a direct result of the deficit ODOT is in. I have looked through the State budget, and although nobody wants to see anyone lose their job, it is the responsibility of the government to assess necessary and nonessential programs and make cuts as needed. The fact you keep funding DEI programs, and defending illegal immigration shows that there is no need to support any new taxes as it is clear the state has determined feel good programs are worth more than necessary programs.
