Public sector, which is supported by Private sector (tax payers) has no shame. For the last 50-60 yrs is increasing it's rows and reward itself constantly with more and more fat salaries and benefits while the Private sector struggles to pay for them. They never cut their salaries or benefits when the economy suffered but put more pressure on the people which pays their earnings. Their first interests is their pockets. Never they ware able to balance the debt, their solution always was to raise taxes. This has to stop, working people are sick and tired of these leeches which believes they are above the working class. NO NEW TAXES. OREGON needs a DOGE Office . Reduce the "elite" salaries and benefits. None of the salaries (position) and benefit for the Public sector should not be higher the same position or benefits in the Private sector. It is the time to clean the "house"

NO NEW TAXES, NO NEW MEASSURES, NO NEW
BONDS, NO MORE PRESSURE ON THE WORKING CLASS
